Committee Reports

Protocols—Dave handed out CD's for review, asked to have people review and send back changes in next couple of weeks. The new revisions won't reflect the changes to ACLS. The idea of copyrighting the protocols was discussed, due to increased occurrence of requests for viewing ECEMS protocols. Support was shown for going forward with copyrighting. Chad relayed that a lot of western Oregon departments have been interested in ECEMS protocols. A decision was made that any Oregon agency can receive ECEMS protocols, but any National requests are to be referred to Bill Porter.

DHS-EMS—No Report.

Others—Ken asked if anyone had talked to Bob Sjolund regarding the possibility of having a page on the COFCA/COFIA website, options were discussed.

CISD—No Report.

Old Business—

1. COCC Letter—Issue was discussed and ideas were gathered to form the letter. Bill Porter will design the letterhead, Dusty will draft the letter and pass off to Mike to approve and sign.
2. 24/7—Lapine using fire portion, working well. Dave commented that Zoll Medicals system is the best for field folks, sweet has best looking reports. Justin asked about a standard transfer form for writing charts at the station. Idea was to manage the program through ECEMS, and agencies could order the forms through ECEMS. Benjamin to spear head the program, will report back soon.

3. Bluetooth Update—Jon reported that since the quote was made Zoll has made an easier way to transmit the information. It eliminates the need for the PDA. Dave has forwarded all the information on. Jon will have more information after visiting with the cell reps.
4. EMS Conference—Chad talked with Ross today, registrations are coming in, finalizing speakers and facilities. Not a lot of vendors, more emphasis on education and labs. Vendor show February 3rd, in Salem.

New Business—

1. Dave reported that there is a lack of communication with SCMC-Bend admitting clerks and EMS folks. Please pass along to all your crews to make it a point to exchange patient information so the patient can get into the system.
2. DAVE STILL WANTS A KEY! ☺
3. Tom asked about obvious death issues. Code 1 vs Code 3 responses. Dave reported that they are still going code 3, to decrease the chance of possible litigation.
